GAURAV PUSHPAM

OBJECTIVE

I seek challenging opportunities where I can fully utilize my skills for the success of the organization.

EXPERIENCE

Lonex Corporation Pvt. Ltd.

August, 2023 - Feb, 2024

Node js backend developer (internship)
Developed a set of RESTful APIs using Node.js, Express, and MongoDB to facilitate communication between different components. Implemented CRUD operations, authentication, and data validation to ensure secure and efficient API functionalities.
During my internship as a Node.js Backend Developer, I Successfully developed and deployed APIs for various live projects, including a salon management system, a seafood buy-and-sell website, a rental web application, e-learning platform etc.

PROJECTS

MERN Stack CRUD Application with User and Admin Panel

Constructed a robust MERN CRUD application with distinct user and admin panels. Integrated user authentication, data management, and role-based access control. Crafted intuitive user interfaces for seamless navigation and interaction, demonstrating proficiency in full-stack development.

Online job portal

Developed a Job Portal using MERN stack where job seekers can easily apply for jobs and recruiters can effortlessly post job openings. Implemented user-friendly features for seamless job search and application process

Online BookStore

I developed a MERN-based bookstore project offering users access to a diverse selection of books. This showcases my web development proficiency and ability to create functional, user-friendly online platforms. Through this project, I honed skills in front-end and back-end development, database management, and user interface design.

Blog Application

I developed a MERN-based blog application showcasing user-friendly interfaces, user authentication, and essential features like blog creation and reading. Users can register, login, and post blogs, while also accessing others' posts. Demonstrating full-stack proficiency, the project utilized MongoDB, Express.js, React.js, and Node.js for seamless functionality.

Reactjs Ecommerce shopping project (ESHOP)

I worked on an exciting project where I created a website for online shopping using React.js. The goal was to make it easy for people to browse products and make purchases in a user-friendly way. I focused on designing different parts of the site, like how products are shown, detailed product pages etc.

Tour and Travel website

Developed an immersive Tour and Travel website using React.js, providing users online experience for exploring and travel destinations. Implemented an user friendly user interface for browsing various travel packages and destinations
